Cappellini Around The World

Un viaggio attraverso alcune delle principali città del mondo interpretate con la suggestione degli arredi Cappellini.

Luoghi diversi per storia, localizzazione geografica, cultura e tradizione, a cui Cappellini si ispira per raccontare l'eclettismo e la multiculturalità della propria Collezione di arredi contemporanei progettata dai più acclamati designers internazionali, a cui si aggiungono le iconiche luci e gli accessori del catalogo Progetto Oggetto.

Queste proposte vogliono essere un suggerimento per dealers, architetti, interior designers e fruitori finali di come, mixando prodotti e finiture diverse dell'ampia collezione Cappellini, si possano ottenere ambienti sempre differenti tra loro, dal taglio più classico a quello più contemporaneo. Un vero e proprio stimolo all'esercizio per chi ama l'architettura e il design.

Aree living, pranzo e notte, in due diverse dimensioni, caratterizzate da segni riconoscibili, in un'alternanza di arredi semplici o di forte impatto, di colori tenui o decisamente caratterizzati.

Involucri rigorosi ed essenziali, che accolgono in modo naturale gli arredi della collezione Cappellini. Dalle suggestioni asiatiche al rigore europeo, dal calore sudamericano al fascino mediorientale, queste stanze stimolano la nostra fantasia e il piacere di crearci una casa che ci racconti.

Le prime dodici località, disseminate in tutto il mondo, sono solo l'inizio di un viaggio esplorativo del brand, un marchio girovago e libero alla continua ricerca di nuova creatività e di nuove contaminazioni culturali.

A journey through some of the major cities around the world, interpreted with the splendor of Cappellini furnishings.

Different places in terms of history, geographical location, culture and tradition, inspiring Cappellini to portray the eclecticism and the multiculturalism of its collection of contemporary furnishings, iconic lighting devices and accessories of the Progetto Oggetto catalog, all designed by the most popular and acclaimed international designers.

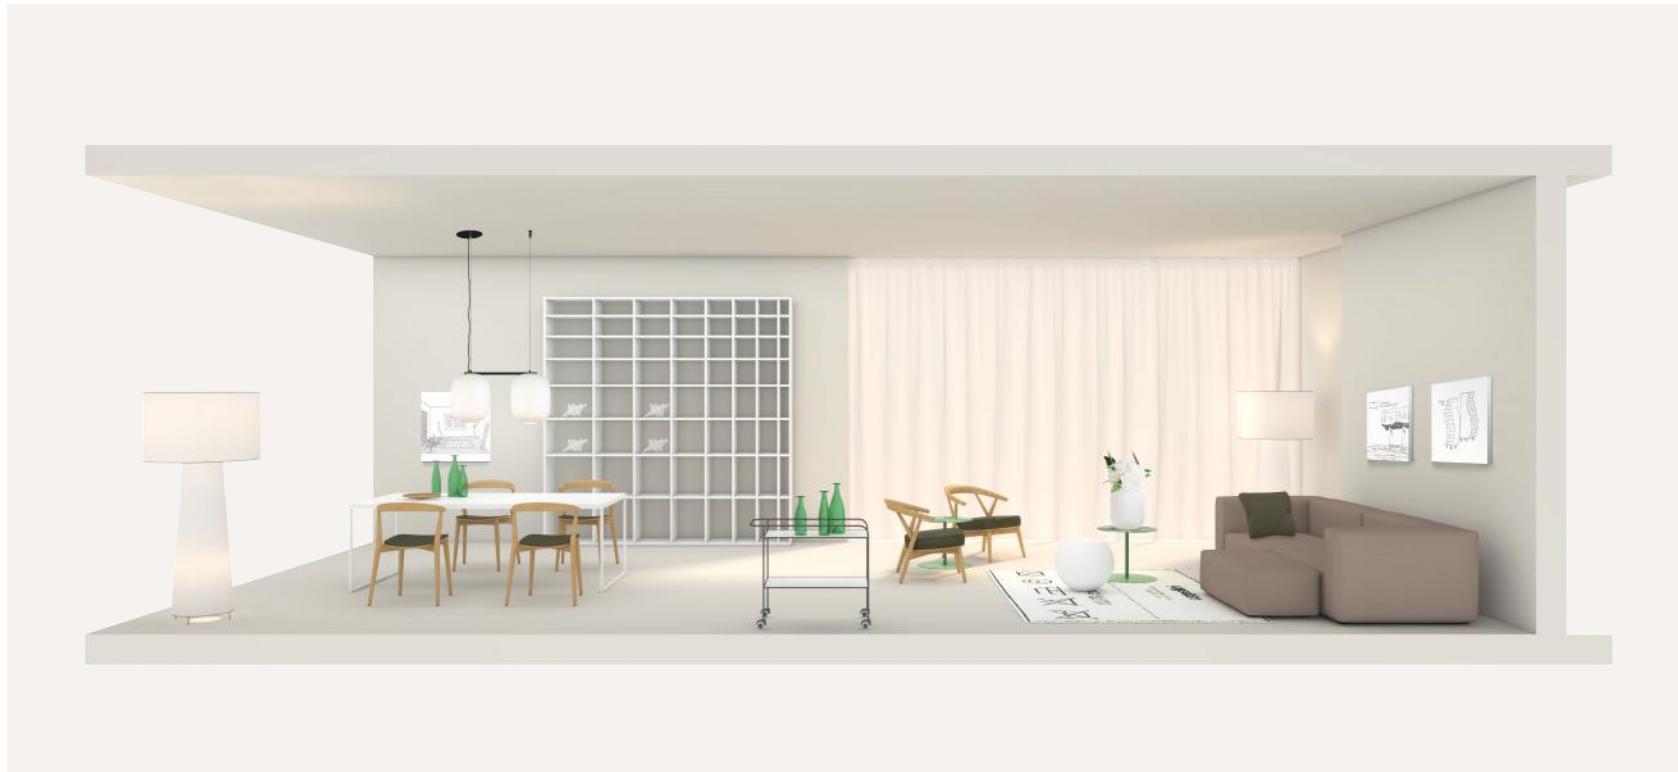

These proposals are a suggestion for dealers, architects, interior designers and end-users on how to create innumerable settings, with a more classic or more contemporary style, by mixing different products and finishes from the wide Cappellini collection. A real incentive to practice for all architecture and design lovers.

Living, dining and sleeping areas, in two different dimensions, characterized by highly recognizable marks, with a succession of simple or sophisticated furniture, of soft or brilliant color shades.

Rigorous and essential casing, naturally hosting the furnishings of the Cappellini collection.

From the Asian magnificence to the European rigor, from the South American warmth to the Middle Eastern fascination, these settings inspire our imagination and the pleasure to create our own homes.

The first twelve locations, spread throughout the world, are only the beginning of an exploratory journey of the brand, a free and wandering trademark always looking for new creativity and new cultural contaminations.
